General Information

Shaw's 19-3-5 with Team[®] Pro 86, is a pre-emergence herbicide for control of annual grasses and broadleaf weeds in established turf grasses and established landscape ornamentals. This new Team[®] contains a 1 to 1 ratio of Benefin and Trifluralin for improved efficacy of common lawn annual grasses and weeds. (See back for weeds controlled and suppressed.) This fertilizer has 25% of nitrogen coming from poly-coated sulfur coated urea, to give long lasting feeding, plus phosphorus and potash to help thicken turf, improve disease and drought tolerance.
