8.0% Combined Sulfur (S)	

Source of Nutrients:

Hydrolyzed feather meal, ammonium sulfate, meat meal, bone meal, sulfate of potash and blood meal.

*This product contains 5.6% slow release nitrogen derived from hydrolyzed feather meal and meat meal.

General Information:

Nature Safe 12-2-6 Ammonium Sulfate Fortified Fertilizer is designed for use when immediate color and growth is desired along with the natural release of high quality proteins. It is ideal for high pH soils but also performs well on all soil types. This product will jump start your turf in the spring and also helps revive turf in the early fall after the hot summer stress periods. The meat by-product meals within Nature Safe 12-2-6 make for a healthy soil and in turn healthy turf. This product was also designed for multiple applications during grow-in situations. The quick release nitrogen encourages growth with timely applications. The slow-release organic proteins and carbohydrates will build up a long lasting, slower feed for development of healthy deep roots. Virtually all of the product is utilized through complete plant uptake, minimal leaching and volatilization.

Directions for Use:

Established Turfgrass: Use as a topdressing for tees, roughs and fairways or any established turf. Apply 4.25 to 8.5 lbs. per 1,000 sq. ft. (0.5 to 1 lb. of actual N). Three to four applications per year are recommended. Covers 6,000 to 12,000 sq. ft.

Fine grade: Suggested for use on turf mowed at heights of 1/8" or greater.
