## USDA NOP Approved Fertilizer

Perfect Blend 4-4-4 is designed, when applied correctly, to meet all your fertilizer needs for 100% NOP Certified Organic Crops.

### Proprietary Organic Process!

Perfect Blend fertilizers are made using a proprietary process that produces a high quality Complex Nutrition Enabling Fertilizer (CNEF™). CNEF™ provides high quality complex nutrition to soil microbes that are responsible for breaking down minerals for plants while helping to maintain a balanced pH in your soil.

### Mycorrhizal Spore Inoculants

Mycorrhizal is a valuable beneficial fungus, not hazardous to humans, that is of great benefit to most turf grasses, plant, shrubs, and trees. Perfect Blend fertilizer is inoculated with a blend of three dormant mycorrhizal spore species, *Glomus intraradices*, *G. aggregatum* and *G. mosseae* at approximately 2.58 propagules per gram total. 100% mycorrhizal strength guaranteed for two years after bag crimp date if product is kept in a dry location at less than 110° F. Fertilizer nutrient values expire after seven years.

### APPLICATION DIRECTION:

**Established Turf grass:** Apply as a top dressing for fairways, rough, lawns, greens, landscapes, or on any established grass. Apply 12.5 lbs to 25 lbs per 1,000 square feet for application of 0.5 lb. to 1 lb. of actual nitrogen per 1,000 square feet. The maximum value of these fertilizers is obtained when applied during aeration.

### Ornamentals and Flower Beds:

Apply 1 lb. (Approximately 4 cups) per 25 sq ft. Work into the soil prior to placing flowers or ornamentals. Repeat application when buds bloom and in the late fall before frost.

### Starter or Grow-Ins:

Apply 25 lbs of fertilizer per 1,000 sq. ft. for 1 lbs. of nitrogen. Till or rake into the top 2"-4" after surface spreading.

### Bulk Applications:

Apply 1,250 lbs of fertilizer for each 50 lbs. of nitrogen required. Apply 2,500 lbs. of fertilizer for each 100 lbs. of nitrogen required. Apply 5,000 lbs. of fertilizer for every 200 lbs. of nitrogen required.
