

“The Signature program applied every 14 days worked beautifully. The turf was green, lush and healthy. By preventing the onset of disease during the summer, the turf went into winter in good enough shape that we didn’t see any associated decline.”

Rob Buege, Tara Golf and Country Club, Sarasota, FL

Turf Disease	Chipco® Signature Use Rate (oz per 1,000 ft ²)	Application Interval
Pythium diseases Yellow tuft	4.0 – 8.0	14 – 21 days
Summer decline (<i>Pythium</i> , Anthracnose and <i>Rhizoctonia spp.</i>)*	4.0 – 8.0	14 days

*Use Chipco Signature as the foundation product tank mixed with other labeled fungicides.

WHAT IT IS.

Systemic fungicide with *StressGard*™

WHAT IT DOES.

It’s the foundation turf fungicide for disease management and turf quality in every season.

- Provides *Pythium* control
- Protects turf from stresses during summer and winter decline
- Improves turf quality-color, vigor, uniformity, playability

OTHER BAYER PRODUCTS.

To fight summer decline, tank mix with 26 GT,[®] Banol,[®] Tartan[®] or Daconil.[®] For winter decline and snow mold programs, tank mix with 26 GT and other snow mold fungicides.

WHY IT BEATS THE COMPETITION.

- Proven, unsurpassed improvement in turf quality during summer stress periods
- Use it with confidence as your foundation program
- No disease resistance in over 20 years

HOW IT MAKES YOUR JOB EASIER.

Chipco Signature is a classic no-worry winner that always comes through and gives you the turf your players and customers want: green, healthy, dense and playable.

THE SCIENCE OF CHIPCO® SIGNATURE FUNGICIDE.

Unlike other fungicides, Chipco® Signature is truly systemic, traveling up and down within the plant. It helps turf “self-manage” stress in several ways:

- Stimulates production of phytoalexins, the plant’s own natural defense chemicals
- Increases carbohydrates in plant tissue, which improves growth and recovery under stress
- Stimulates growth of mycorrhizae, which improves growth and health

Use Chipco Signature or Chipco Signature tank mixes for:

- Summer turfgrass decline
- *Pythium* diseases
- Anthracnose
- Bentgrass deadspot
- Yellow tuft

The foundation product.

- Unsurpassed turf quality
- Helps turf “self-manage” stress
- Tank mix options with many fungicides
- No disease resistance for over 20 years

Frequently asked questions.

- >Q What is turf quality and how does Chipco Signature fungicide affect it?
- >A Chipco Signature does more than fight disease. In years of research, it’s been proven to enhance turf quality—a measurement of vigor, root development, density, color, uniformity and over-all appearance.
- >Q What’s your recommended summer decline management program?
- >A Application timing is critical. For maximum effectiveness, begin making applications before turf is stressed. Continue every 14 days until summer decline is no longer an issue.

THE SCIENCE OF YOUR PROFESSION.

Every ounce of Chipco Signature is Backed by Bayer, and all the science and support you need to get the job done right. That’s what you should expect from an industry leader.

Our staff is your staff.

No one invests as much in product development as Bayer. Our scientists’ expertise in chemistry and formulation technology is unrivaled around the world. Our field sales and technical representatives are always ready to help you. You’ll find them, along with additional information, 24 hours a day, 7 days a week at BackedbyBayer.com.

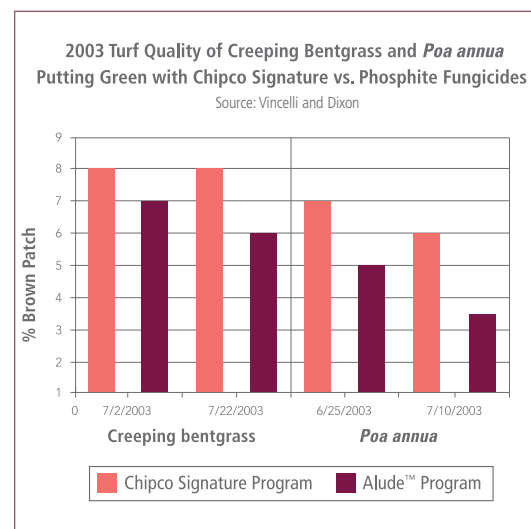

Product support year round.

We’ll help you diagnose problems, troubleshoot issues, and get every product benefit you expect—and even some you don’t. We also offer interactive training throughout the year, to help grow your business and your success.

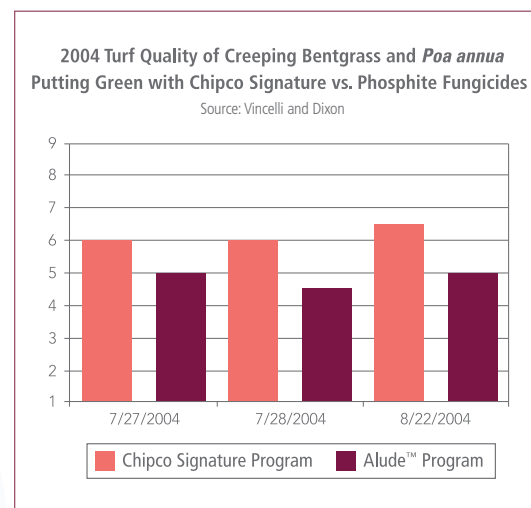

Complete satisfaction guarantee.

Bayer guarantees your satisfaction, after all, your success is our success.
