

# TRIMEC CLASSIC

## BROADLEAF HERBICIDE

Only the weeds will know you've been there.  
The original low-odor herbicide.

Low-odor Trimec® Classic Broadleaf Herbicide is the number one preferred post-emergent herbicide for intensively managed fine turf. In this environmentally sensitive age, we understand that under certain circumstances a low profile concerning the use of any pesticide becomes important.

Introduced over 35 years ago, Trimec Classic still treats more acres than any other premium 3-way. Trimec Classic was the first product formulated for broadleaf weed control in turf and has long been established as the university standard in field trials. Dandelion,

plantain and clover are some of the weeds controlled by Trimec Classic – without harming most turfgrass species.

Cost-per-acre is low because of the synergistic action of its components.

Years of experience have shown that Trimec Classic puts power and efficiency into your weed control program. Where reliable weed control is the goal, Trimec Classic is the economical answer.

Trimec is a registered trademark of PBI/GORDON CORPORATION.
